Precision Equipment and Instruments businesses showed a recovery. Sales volume increase in Imaging Business repelled an impact by strong yen. Total sales and income increased year-on-year both for 3rd quarter and year-to-date results.

* Values in this slide are rounded off to the nearest 100 million.

## Precision Equipment Company: 3rd Quarter

| Billions of yen | 10/3 (A) |  | 11/3 (B) |  | (B)-(A) |  |

| Compact DSC (1,000 of units sold) | 4,080 | 9,220 | 4,900 | 11,600 | +820 | +2,380 |

In all categories, the record sales was marked in terms of quarterly volume. Compact DSC posted $20 \%$ hike in sales volume despite the flat 3rd quarter market growth. Third quarter ended with reduced sales and profit, while the year-to-date results showed sales hike and profit reduction, but would have been posted sales/profit increases if yen appreciation impact is disregarded.

## Instruments Company : 3rd Quarter

| Billions of yen | 10/3 (A) |  | 11/3 (B) |  | (B)-(A) |  |

## Summary for the 3 ${ }^{\text {rd }}$ Quarter of the Year Ending March 31, 2011

Both 3rd quarter and year-to-date results posted increased sales and profit year-on-year in spite of progressing yen appreciation. Free cash flow to date generated additional 65.9 billion yen.

Precision Equipment Company

- Brisk sales of ArF immersion scanner and LCD steppers/scanners for large panels contributed to the profitable quarter.
- Accumulated loss to 3rd quarter was significantly reduced close to the break-even point.

Imaging Company
-Single-lens reflex DSC, interchangeable lenses, and compact DSC continued to enjoy favorable results, while Compact DSC continuously expanded the market share.
-Third quarter ended with reduced sales and profit, while the year-to-date results showed sales hike and profit reduction. But, sales volume increase almost offset the strong yen impact.

Instruments Company
-New products including super resolution microscope, digital microscope ShuttlePix, and non-contact multi-sensor 3D metrology system were warmly received. -Industrial instruments recovered, posting sales hike in 3rd quarter and year-to-date, and significantly shrinking the loss.

## Future Outlook

Performances of Precision Equipment and Instruments are improving as planned. Imaging Company is showing robustness against stronger yen that was unexpected at the year beginning. The business foundation is solidified to achieve continued growth in and after next fiscal year ending March 2012.

## Precision Equipment Company

- More ArF immersion scanners, S620D, are being sold in the 2nd half. To further expand sales next year, efforts are made to improve performances under customer process conditions.
- Strong demands are expected for LCD steppers/scanners for high-precision $\mathrm{mid} / \mathrm{small}-\mathrm{sized}$ panels. Efforts are made to secure purchase orders.
- Leadtime reduction is pursued to prevent opportunity losses and inventory growth for cost reduction.

Imaging Company

- Efforts are made to penetrate into emerging country markets and improve product competitiveness and customer satisfaction. Targets are set to accelerate sales expansion at higher rate than market expansion and to improve profitability by reforming the cost structure.
- New generation digital cameras are under development.

Instruments Company
-It is aimed to secure sales expansion in the industrial instruments field that is in the solid recovery process as well as in the bioscience field that is mainly driven by high-end system products, targeting at posting yearly profit in the next fiscal year.
