3. Forecasts for Year Ending March 31, 2014 (From April 1, 2013 to March 31, 2014)

(Percentage represents comparison to previous fiscal year)

| | Net Sales | | Operating Income | | Ordinary Income | | Net Income | | Net Income per Share of Common Stock |
|-----------|-------------|-----|------------------|------|-----------------|------|-------------|------|--|
| | Million yen | % | Million yen | % | Million yen | % | Million yen | % | Yen |
| Full Year | 1,015,000 | 0.4 | 65,000 | 27.4 | 63,000 | 30.3 | 50,000 | 17.8 | 126.07 |

(Note) Revision of forecast for this period: None

4. Others

(1) Changes of significant subsidiaries during the current fiscal year: None

(Note) This refers to presence/absence of changes to specified subsidiaries accompanying changes in scope of consolidation in the period under review.

(2) Adoption of special accounting methods: None

(3) Changes in accounting policies, changes in accounting estimates, and restatement of revisions

1. Changes in accounting policies with revision of accounting standards: Yes

2. Changes in accounting policies other than the above: None

3. Changes in accounting estimate: None

4. Revision restatements: None

(4) Number of shares issued (common stock)

1. Number of shares issued as of the term end (including treasury stocks):

First Half ended September 30, 2013 400,878,921 shares

Year ended March 31, 2013 400,878,921 shares

2. Number of treasury stock as of the term end:

First Half ended September 30, 2013 4,244,838 shares

Year ended March 31, 2013 4,279,760 shares

3. Average number of shares during the term (consolidated total for quarter):

First Half ended September 30, 2013 396,618,382 shares

First Half ended September 30, 2012 396,553,335 shares

1. Performance and Financial Position

(1) Qualitative Information regarding the Consolidated Operating Results

During the first half ended September 30, 2013, the economic situations in Japan showed some signs of gradual recovery on the back of a series of economic policies; however, the worldwide economy remained slow as a whole, with the US consumer spending remaining at a moderate recovery level, in spite of its recovery trend in the US economy, as well as economic stagnation in Europe and sluggish growth in the emerging economies.

Looking at performance by business segment, in the Precision Equipment Business, the semiconductor-related market was sluggish, while the LCD panel-related market remained strong. In the Imaging Products Business, the compact digital camera market continued to shrink, while the overseas market for the Digital camera—Interchangeable Lens Type performed sluggishly. In the Instruments Business, the bioscience-related market saw ongoing public spending in Japan and the USA, while the industrial instruments-related market was affected by restraint in capital investment related to semiconductors and electronic components.

Amid such challenging business environment, the Group, under the “Management Measures Committee” established in August this year, strove to strengthen existing businesses as a whole group by promoting thorough cost reduction to allow enhancement of profitability and by bolstering supply chain management and introducing feature-rich new products to the markets.

The Group has chosen areas of analysis and diagnosis as particular focus in the health and medical fields, the target field for new business, and worked on research and development as well as on development of human resources who can perform globally.

As a result of the foregoing, net sales for the first half ended September 30, 2013 decreased by 26,759 million yen (5.4%) year on year to 470,484 million yen, operating income decreased by 15,202 million yen (41.0%) year on year to 21,901 million yen, and ordinary income was down by 19,496 million yen (49.3%) year on year to 20,027 million yen, resulting in net income of 13,608 million yen, a decrease of 18,413 million yen (57.5%) year on year.

Performance by business segment is as follows.

1) Precision Equipment Business

In the Precision Equipment market, capital investment by manufacturers remained slow in the semiconductor-related field, while LCD panel-related field remained strong due to the demand for smart-phone/tablet terminals.

In these circumstances, we worked to expand sales in the IC steppers and scanners field, focusing on the latest model NSR-S622D ArF immersion scanner and others.

In the LCD steppers and scanners field, we secured a high market share by working to expand sales of devices that are optimal for production of mid-to-small size high definition displays for smart-phone/tablet terminals, etc., focusing on the FX-66S and FX-67S.

Ongoing efforts were also made to improve our profit structure by shortening production lead times and reducing costs throughout operations.

As a result, the Precision Equipment Business posted higher operating income compared with the target; however, faced with the weak market conditions, net sales decreased by 0.7% year on year to 79,855 million yen, and operating income decreased by 48.2% year on year to 3,732 million yen.

2) Imaging Products Business

In the Imaging Product Business, the compact digital camera market continued to shrink while the overseas market for the Digital camera—Interchangeable Lens Type performed sluggishly.

Under these circumstances, among Digital camera—Interchangeable Lens Type, the mid-class digital SLR camera D7100 enjoyed steady sales. As for the compact digital cameras, marketing was particularly focused on the sales expansion of the ultra high-power zoom camera equipped with a 42x optical zoom lens COOLPIX P520, while several distinctive new products were launched, such as the COOLPIX S6600 equipped with a vari-angle monitor that enables effortless self portraits.

As a result, both Digital camera—Interchangeable Lens Type and compact digital cameras maintained their market shares; however, faced with the difficult market conditions, net sales decreased by 7.5% year on year to 352,580 million yen and operating income decreased by 26.0% year on year to 30,919 million yen.

3) Instruments Business

In the Instruments market, the bioscience-related market remained strong thanks to ongoing public spending in Japan and the USA. The industrial instruments field was affected by restraint in capital investment by manufacturers as to semiconductors and electronic components.

Under these circumstances, sales mainly in inverted research microscopes and the leading-edge super resolution microscope system, etc. grew steadily in the bioscience business. In the industrial instruments business, efforts were made to expand sales with emphasis on non-contact metrology devices; however, sales in the semiconductor- and electronics-related markets declined.

As a result, net sales for the Instruments Business increased by 9.8% year on year to 26,065 million yen, and

operating loss amounted to 3,437 million yen (compared with operating loss of 2,977 million yen in the same period of the previous year).

4) Other Businesses

In the Customized Products Business, sales of space-related products grew considerably, and efforts were made to expand sales of LCD photomask substrates in the Glass Business.

As a result, net sales of these businesses decreased by 0.2% year on year to 11,982 million yen, and operating income increased by 23.4% year on year to 1,953 million yen.

(2) Qualitative information on Consolidated Financial Position

During the first half ended September 30, 2013, total assets increased by 41,505 million yen from the end of the previous fiscal year to 906,173 million yen. This is due mainly to the increase by 38,631 million yen in cash and deposits, the increase by 11,880 million yen in inventories, and the increase by 6,662 million yen in investment securities, in spite of the decrease by 20,930 million yen in notes and accounts receivable-trade.

Total liabilities increased by 19,280 million yen from the end of the previous fiscal year to 393,730 million yen. This is due mainly to the increase by 21,603 million yen in notes and accounts payable-trade.

Total net assets increased by 22,225 million yen from the end of the previous fiscal year to 512,443 million yen. This is attributable mainly to the increase of retained earnings by 9,961 million yen, due to the posting of net income, and the increase by 6,930 million yen in foreign currency translation adjustment due to the progressing yen depreciation.

During the first half ended September 30, 2013, cash flows from operating activities amounted to an inflow of 64,443 million yen (compared with an inflow of 34,673 million yen in the same period of the previous year). This is due mainly to the decrease by 24,931 in accounts receivable-trade, the increase by 15,110 million yen in notes and accounts payable-trade, posting of income before income taxes by 20,027 million yen.

Cash flows from investing activities amounted to an outflow of 25,262 million yen (compared with an outflow of 35,273 million yen in the same period of the previous year), due mainly to the expenditure in the amount of 17,802 million yen for the purchase of property, plant and equipment and the expenditure in the amount of 6,470 million yen for the purchase of intangible assets.

Cash flows from financing activities amounted to an outflow of 4,783 million yen (compared with an outflow of 9,414 million yen in the same period of the previous year) mainly because of 4,756 million yen in cash dividends paid.

(3) Qualitative Information regarding the Consolidated Financial Forecasts

Looking forward, in the Precision Equipment Business, although ongoing uncertainty is left in the semiconductor-related market, steady performance is expected in the LCD panel-related market. For the Imaging Products Business, weak market condition is expected for the Digital camera—Interchangeable Lens Type market for the current fiscal year, and the compact digital camera market is expected to see a continual shrink. In the Instruments Business, the bioscience-related market is predicted to remain strong buoyed by public spending, although the industrial instruments-related market is likely to remain in a difficult situation. To overcome the downturn in the market conditions, the Group will strive to improve profitability by seeking further cost reduction and launching feature-rich new products.

The consolidated financial forecasts for the year ending March 31, 2014 shall be as stated in the “Revision of the Financial Forecast for the Fiscal Year Ending March 31, 2014,” announced on October 31, 2013.

2. Notes Regarding Summary Information (Others)

(1) Changes in Significant Consolidated Subsidiaries

Not applicable

(2) Changes in Accounting Policies, Accounting Estimates and Restatement of Corrections

(Changes in Accounting Policies)

Due to the application of IAS 19 "Employee Benefits" (revised in June 16, 2011) from January 1, 2013, the method of recognition and presentation of actuarial gains and losses, past service cost and interest cost changed from the first quarter of fiscal year ending March 31, 2014 in certain overseas subsidiaries.

Those overseas subsidiaries applied the revision in this policy retrospectively, and the consolidated quarterly financial statements for the previous year and the consolidated financial statements for the previous year changed due to the retrospective application. The effect of this retrospective application on the consolidated quarterly financial statements for the previous year and the consolidated financial statements for the previous year was immaterial.
