1. Performance and Financial Position

(1) Qualitative Information regarding the Consolidated Operating Results

During the nine months ended December 31, 2015, in the Precision Equipment Business, capital investments to the Semiconductor Lithography System slowed down. In the Flat Panel Display (hereafter "FPD")-related field, capital investments for both large panels and mid-to-small size panels recovered, and the market was firm. In the Imaging Products Business, the Digital camera—Interchangeable Lens Type market and the compact digital camera market remained sluggish. In the Instruments Business, although public spending in Japan contracted in the microscope-related field, in the industrial metrology-related field, capital investments in regard to semiconductors and electronic components increased and also stayed firm in the automobile-related field.

Under these circumstances, net sales for the nine months ended December 31, 2015 decreased by 428 million yen (0.1%) year on year to 617,390 million yen, operating income increased by 2,301 million yen (8.6%) year on year to 29,029 million yen, ordinary income was up by 7,380 million yen (26.5%) year on year to 35,224 million yen, resulting in net income attributable to owners of parent of 21,461 million yen, an increase of 4,729 million yen (28.3%) year on year.

Performance by business segment is as follows.

In the Precision Equipment Business, the Group continued focusing on expanding its share in the Semiconductor Lithography System field, endeavoring to improve profit by strengthening sales of used equipment and service sales. In the FPD Lithography System field, with steady capital investments by manufacturers, sales volume of equipment, especially for high-definition, mid-to-small size panels, showed a significant increase compared with the previous year. Under these circumstances, overall profit of this business segment improved year on year.

In the Imaging Products Business, with respect to compact digital cameras, high value-added products such as high-magnification models recorded strong sales and expanded their shares amid the continued shrinkage of the market. Sales volume of the Digital camera—Interchangeable Lens Type fell due to the impact of the shrinking market, and year-end holiday season sales decreased year on year in the US and Europe, while sales of high-end models were firm in China. Consequently, overall revenue and profit of this business segment both declined year on year.

In the Instruments Business, although the microscope-related field was affected by the reduction in the public spending in Japan, sales increased due to the favorable turn for sales in the US and the expansion of share in China. In the industrial metrology-related field, sales rose due to an increase in sales volume of semiconductor inspection equipment stemming from a boost in capital investments related to semiconductors and electronic components, as well as firm capital investments in the automobile-related field. As a result, overall profit of this business segment improved year on year.

In the Medical Business, retinal diagnostic imaging equipment of UK-based Optos Plc is showing a strong performance mainly in the US, Asia, and Oceania.

(2) Qualitative Information on Consolidated Financial Position

The balance of total assets as of December 31, 2015 increased 58,855 million yen from the end of the previous fiscal year to 1,031,801 million yen. This is mainly due to an increase in inventories by 29,337 million yen; and an increase in intangible assets by 41,651 million yen principally through the business combination with Optos Plc as making it a wholly-owned subsidiary; despite a decrease in cash and deposits by 10,921 million yen due to a payment to acquire shares of Optos Plc.

The balance of total liabilities as of December 31, 2015 increased 60,041 million yen from the end of the previous fiscal year to 460,786 million yen. This is primarily attributable to an increase in notes and accounts payable-trade by 11,116 million yen; and an increase in advances received by 44,239 million yen, which is included in "Other" of current liabilities.

The balance of total net assets as of December 31, 2015 decreased 1,185 million yen from the end of the previous fiscal year to 571,015 million yen. This is mainly because of a decrease in the foreign currency translation adjustment by 9,954 million yen, as the value of Japanese yen increased mainly against the currencies of emerging economies; and a decrease in valuation difference on available-for-sale securities by 1,501 million yen; in spite of an increase in retained earnings by 9,484 million yen mainly as a result of posting net income attributable to owners of parent.

During the nine months ended December 31, 2015, net cash provided by operating activities amounted to 83,028 million yen (net cash of 38,313 million yen was provided in the same period last year). This is mainly due to inflows from posting 34,704 million yen of income before income taxes; from an increase in notes and accounts payable-trade by 10,437 million yen; from an increase in advances received by 42,399 million yen; and an outflow from an increase in inventories by 29,500 million yen.

Net cash used in investing activities amounted to 88,630 million yen (net cash of 23,896 million yen was used in the same period last year) primarily attributable to an expenditure of 16,701 million yen for purchase of property, plant and equipment; a payment of 43,562 million yen, which was associated with the acquisition of shares of Optos Plc at the time of making it a wholly-owned subsidiary; and an outflow from an increase in time deposit over 3 months by 16,950 million yen.

Net cash used in financing activities amounted to 14,858 million yen (net cash of 24,149 million yen was used in the same period last year). This is mainly because of a payment of cash dividends by 11,789 million yen.

(3) Qualitative Information regarding the Consolidated Financial Forecasts

As for the full year performance forecasts, in the Precision Equipment Business, capital investments to the Semiconductor Lithography System are expected to slow down, and strong capital investments are projected in the FPD-related field. In the Imaging Products Business, the Digital camera—Interchangeable Lens Type market and the compact digital camera market are both expected to shrink continuously. In the Instruments Business, stable performances are anticipated for the microscope-related field in the US market, and continuous expansion of shares is expected in China. Firm capital investments are expected to continue in the entire industrial metrology-related field.

As for the full year consolidated financial forecasts, the forecasts announced on November 6, 2015 have been revised as follows, since net sales are expected to fall below the projection primarily due to a decline in the number of sales of Semiconductor Lithography System in the Precision Equipment Business, a decrease in demand of the Digital camera—Interchangeable Lens Type and Interchangeable lens, and the postponement of the release of some new products in the Imaging Products Business.

As for income, although net sales have been revised downward, the previous forecast remained unchanged due to the factors such as improvement of product mix and cost restraint in the Imaging Products Business.

From the first quarter ended June 30, 2015, the reportable segments were changed from prior "Precision Equipment," "Imaging Products," and "Instruments" to "Precision Equipment," "Imaging Products," "Instruments," and "Medical" by adding "Medical" segment.

Under the Midterm Management Plan, "Next 100 - Transform to Grow," announced in June, 2014, the Group added the Medical Business to its main operations and fully entered the business through an acquisition of Optos Plc in the first quarter ended June 30, 2015. Based on this situation, the Group came to a conclusion that it is reasonable to disclose "Medical" segment as a discrete reportable segment.
