

Nikon Long-Term Environmental Vision

Established April 1, 2016,
revised February 26, 2020

The Nikon Group contributes to building a sustainable society through its Nikon Long-Term Environmental Vision, established for Realizing a Decarbonized Society, Realizing a Resource Circulating Society, and Realizing a Healthy and Environmentally Safe Society. The Nikon Group is committed to developing new businesses and tackling innovations that will contribute to reducing environmental impacts.

(Target period: Fiscal year ending March 31, 2051)

* 90% reduction of GHG emissions (Scope1, 2, and 3) throughout the value chain, with the remaining emissions neutralized according to internationally recognized criteria.
