・HASP Activation

To uses NIS-Elements V3.20 or later, HASP Key should be activated.
By doing the Activation, date (GMT) that uses NIS-Elements first is written into HASP Key and becomes possible to use NIS-Elements since V3.20.

There are two ways in HASP Activation; one is "Online Activation" another one is "Manual Activation".
In the "Online Activation", there are methods of using "NIS-Elements" and using "HASP Update".

"HASP Update" is one of the functions included in software of "HASP Utilities" bundled to the product of NIS-Elements.
In "HASP Update", "Manual Activation" that can activate HASP Key in the environment from which PC that operates NIS-Elements is not connected with the Internet is software used.
It is software that can use PC that operates NIS-Elements is not connected with the electronic environment.

The method of "Online Activation" would be explained here.
Please contact the Nikon product handling shop where NIS-Elements was bought when it fail in "Online Activation" or PC cannot be used by the electronic environment.
